

HOW TO INSTALL MARKERLESS WEB AR USING ARCORE FOR ANDROID AND IOS

This documentation will help you to install Markerless Web AR using ARCore for Android and iOS. It's a simple procedure with few steps.

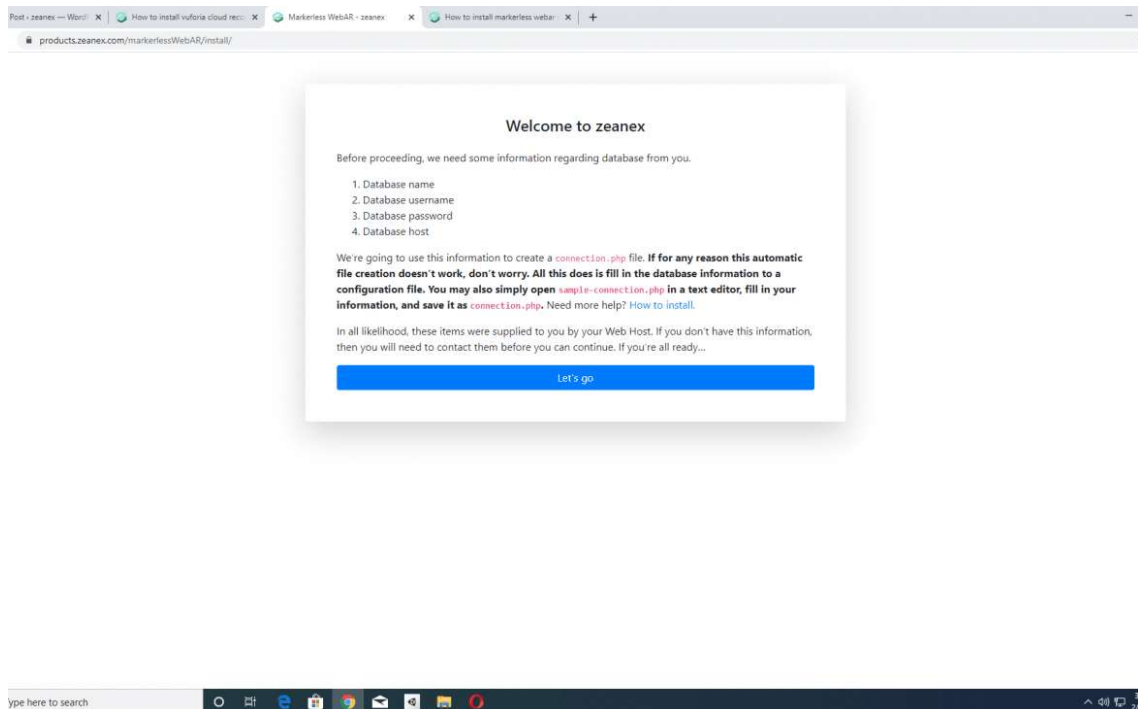

Upload Files on Hosting:

Now we will upload all files and folders that are in the markerlessWebAR.zip to the desired place in hosting:

- In the root directory of the website. (For example, <https://example.com/>)
- In the sub directory of the website. (For example, <https://example.com/markerlessWebAR/>)

Begin Installation:

After uploading files on hosting. Now, the second step is to begin Installation. Visit your domain (<http://example.com/>) or sub domain (<http://example.com/markerlessWebAR/>) or where ever you have uploaded your files.

Create Database:

- After installation the next step is to create a database and it's user with all privileges on your hosting. As, we need following information in next step:

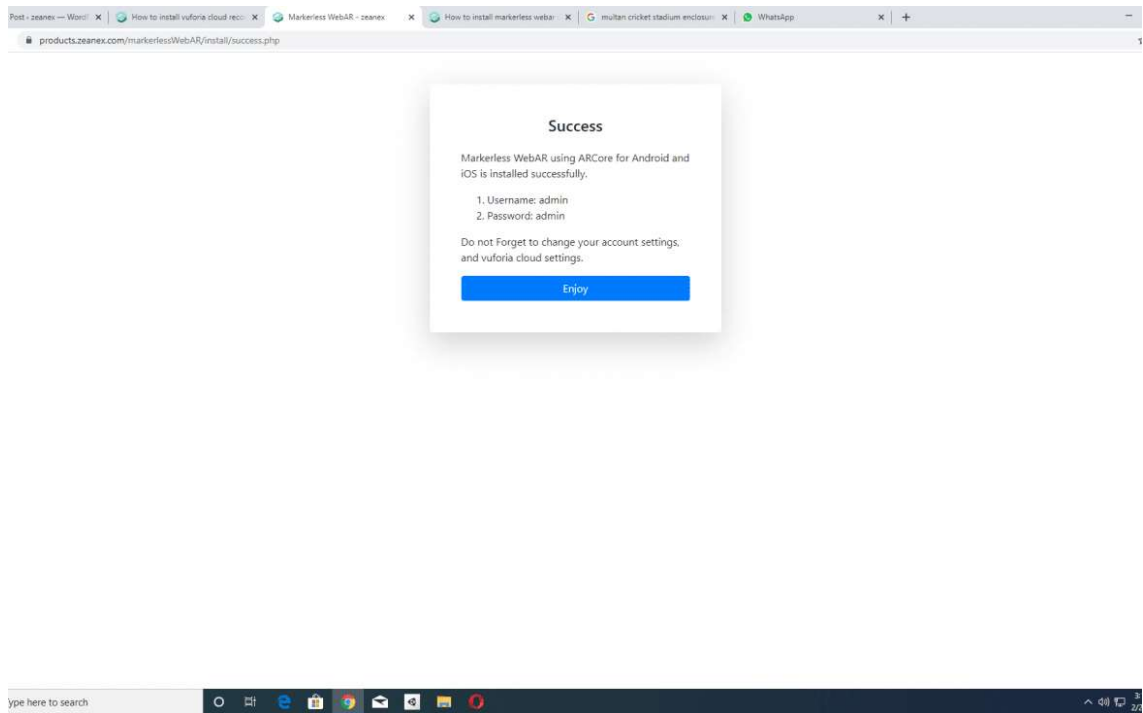

1. Name of Database.
2. Username of Database.
3. Password of User.
4. Database host

Now we have all this information. So we will click on the let's go button.

A modal form titled 'Database Connection!'. It contains four input fields: 'Database Name' with placeholder text 'Enter Database Name...', 'Database Username' with placeholder text 'Enter Database Username...', 'Database Password' with placeholder text 'Enter Database Password...', and 'Database Host' with placeholder text 'Enter Database Host...'. At the bottom of the form is a blue button labeled 'Connect Database'.

Fill in all the information, and click on connect database.

All the installation is done successfully.

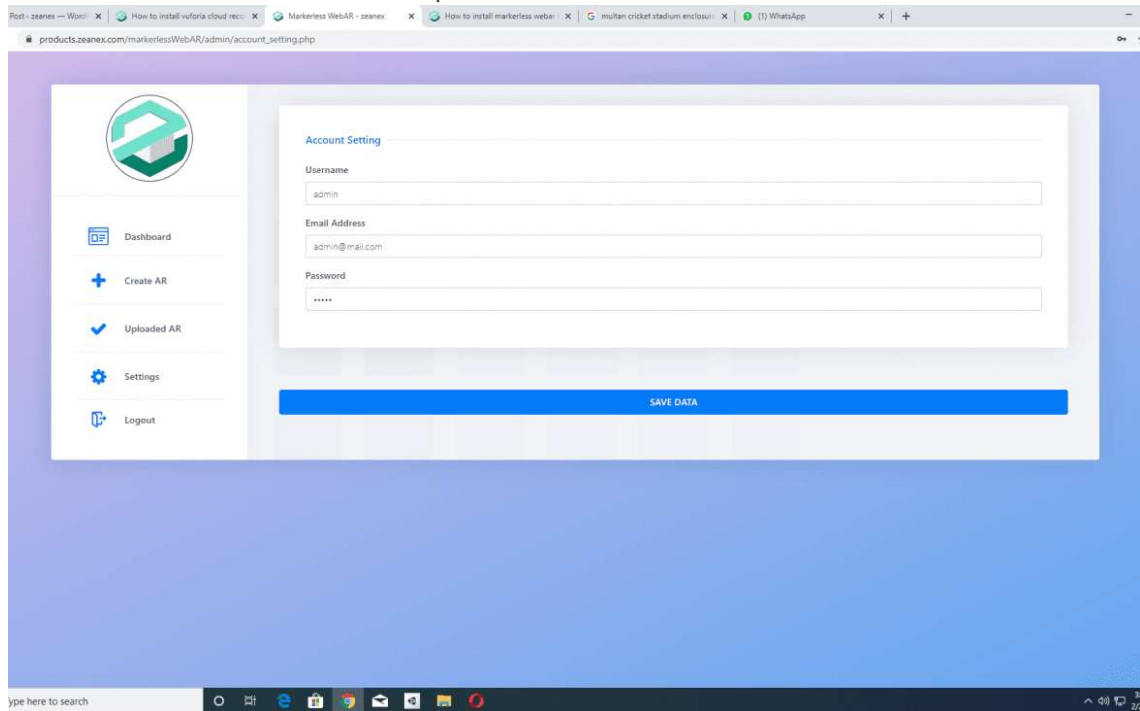

Now we will click on Enjoy button and after that we need to login in your web panel using:

1. **Username:** admin
2. **Password:** admin

Change Username and Password

Now for security reasons first of all we will go to Account Settings and change them. After that we will enter our values and click on the proceed data.

The screenshot shows a web browser window with multiple tabs open. The active tab is 'products.zeanex.com/markerlessWebAR/admin/account_setting.php'. The page has a purple header and a sidebar on the left with a logo and navigation links: Dashboard, Create AR, Uploaded AR, Settings, and Logout. The main content area is titled 'Account Setting' and contains three input fields: 'Username' (with 'admin' entered), 'Email Address' (with 'admin@mail.com' entered), and 'Password' (with masked characters '*****'). A blue 'SAVE DATA' button is at the bottom of the form. The Windows taskbar is visible at the bottom of the browser window.

That's all, Thank You
